

Medical Summary Template Directions

This document will guide you in creating a personalised medical summary to give to your healthcare professionals. It should tell them about your injury, your abilities, and what's important to you.

Once you have downloaded this template make sure you save it somewhere safe so that you can go back and update it as things change.

How does the template work? - It's simple - just fill in your details, select options that apply to you and delete any information that is not relevant.

If you're having trouble filling it in, talk to a member of your healthcare team that you feel comfortable with.

A FEW TIPS

Adding new rows to a table

- Select row – right click – add row above or below

Deleting rows in a table

- Select row – right click – delete row
